- Consolidated and same store sales jumped 10\% and 3.3\% YoY respectively thanks to successful strategies to deal with price-sensitive customer behaviors. Customer base expanded by attracting families purchasing daily necessity items. Tourists generated greater contribution to sales.
- GPM went up 0.6pts YoY to $27.0 \%$ which hit the bottom with our three-phased strategies after the consumption tax hike. GPM improved backed by more tourists' sales despite greater sales of daily commodities with high-turnover and low-margin. GPM was an all-time high $27.37 \%$ in Q3.
- SGA to sales ratio fell 0.3pts to 20.4\%. Cost increased due to initial cost of greater-than-expected 22 new store openings. Moreover, personnel cost went up mainly because of more man-hour triggered by increase in our shares in daily necessities and tourists' sales. Cost increase was more than offset by total sales growth.
- OP grew 16\% YoY, exceeding the 10 billion yen-mark for the third consecutive quarter. Full year sales and OP are expected to grow for a record 26 consecutive years.
